

Research & Services | Microanalysis Laboratory (Yissum)

code: 34-2007-1826

Isabela Melman, HUJI, Faculty of Science, The Institute of Chemistry

Categories

Microanalysis, elemental analysis

Objective/function

- The Microanalysis Laboratory provides elemental analysis service for universities, chemical and pharmaceutical companies, research and industrial foundations

Research provided

- The laboratory analyzes
- C, H, N; content of halogens Cl, Br, I, F and S, P in broad spectrum
- Synthesized organic compounds
- Natural products
- Coal and coal derived materials
- Pharmaceuticals
- Industrial samples

Advantages

- The Microanalysis Laboratory has more than 50 years of experience in organic micro elemental analysis by utilizing state-of-the-art equipment and technologies

Available equipment

- Perkin-Elmer 2400 series II Analyzer with high speed microprocessor control, solid-state components and built-in diagnostics
- Metrohm 686 Titroprocessor

Staff

- Isabella Melman, MSc
- Leah Cohen
