

**Anti-progesterone-7 monoclonal antibody (Yeda)**

**code:** T4-138

[Fortune Kohen](#), Biology, Biological Regulation

**Summary**

Due to their high specificity and sensitivity these antibodies may be applicable for research, diagnosis and therapeutics. A particular use may be quality control of industrial manufacturing of food products. Monoclonal antibodies raised against progesterone-7-carboxythio thioether-BSA (clone 2H4, Rat IgG1) and progesterone-11-hemisuccinate-BSA (clone 1E11, IgG1). Progesterone is a C-21 steroid hormone involved in the female menstrual cycle, pregnancy and embryogenesis of humans and other species. Reference: Jozef G. De Boever, Fortune Kohen, Eugene Bosmans. 1994. Binding of homologous and heterologous isoluminol- and enzyme-labelled progesterone conjugates to monoclonal antibodies. *Analytica Chimica Acta*. 290: 239-245

**Monoclonal antibodies for peptide and steroid hormones** Due to their high specificity and sensitivity these antibodies may be applicable for research, diagnosis and therapeutics. A particular use may be quality control of industrial manufacturing of food products.

**138,146 - Monoclonal antibodies to Progesterone** -Description: Monoclonal antibodies raised against progesterone-7-carboxythio thioether-BSA (clone 2H4, Rat IgG1) and progesterone-11-hemisuccinate-BSA (clone 1E11, IgG1). Progesterone is a C-21 [steroid hormone](#) involved in the [female menstrual cycle](#), [pregnancy](#) and [embryogenesis](#) of humans and other species.
